

## Night work and changes to kerbside uses on Clarence Street, Sydney

In planning for Tomorrow's Sydney, we are improving the bus network within the city centre to reduce congestion and support reliable transport services as part of the Sydney City Centre Access Strategy.

### Details of work activities

Road resurfacing work will take place nightly from **Wednesday 20 September** at the following location:

- Clarence Street, from Jamison Street to Market Street.

Work will take approximately two weeks to complete, weather permitting. Our working hours are from 9pm to 5am.

Work involves milling, asphaltting, lane marking and installation of new kerbside signage.

### How will the work affect you?

There will be some noise associated with this work. The noisiest work will be carried out before midnight.

There will be some temporary traffic changes to ensure the work zone is safe.

Pedestrian access will be maintained and vehicle access will be restricted. Please keep to speed limits and follow the direction of traffic controllers and signs.

Please note bus stops on Clarence Street will be temporarily relocated to Kent Street during night work. Please refer to pink signs at closed bus stops for further information.

### Changes to kerbside use

As part of these capacity improvements, changes to kerbside use on Clarence Street outlined in the *Sydney City Centre Capacity Improvement Review of Environmental Factors (REF)* will soon take effect. The mobility spaces on Clarence Street have already been relocated to Jamison Street and Barrack Street in 2015. In response to feedback from the community to the REF additional night time parking spaces have been retained.

These changes to street signs will occur progressively from **Sunday 24 September** following the asphaltting and lane marking work, weather permitting. Motorists are advised to check kerbside signage during this period. We have included a map to help explain the changes.
